

Digital Learning
and Teaching Victoria

Implementing DigiTech across the whole curriculum

Across the whole of Australia, there has been an increasing interest in how DigiTech can improve literacy and numeracy outcomes. Nevertheless, early years and primary school teachers continue to find that implementing DigiTech across the whole curriculum can be a challenging process.

This heavily subsidised workshop, organised by DLTV in conjunction with their industry partners The Australian Computing Society and 2Simple Software aims to offer inspiration and support in implementing DigiTech across the whole curriculum.

What is included?

- Sessions which aim to improve teacher confidence with Digital Technologies.
- Demonstrations of simple, yet effective DigiTech resources.
- Networking opportunities with other teachers.
- Digital resources on USB to help guide your school in implementing the Digital Technologies Curriculum.
- Light refreshments at the end of the workshop.

19th March 2020 | 4pm - 5pm

Mernda Central School
70 Breadalbane Ave, Mernda
